Cleaning
Without
Water*

**Anything
but waste!*

J. Kötting GmbH

Plastics & Machine Sales

The technique

INPUT
= soiled plastics
containing recy-
clable materials

- = screenings
- = heavyweight particles which are not separated by the sifter
- = paper-plastic composites

OUTPUT
=
recyclable
plastics

- = as grinding stock
- = for material utilization
 - ▶ Park benches
 - ▶ Pallets
 - ▶ Grass pavers

The machine: KR 30

** Anything
but waste!*

The

Cleaning
Without
Water

procedure

This new technology enables a dry cleaning of plastics.

The robust machine separates plastics from soiling, like e.g.:

- ▶ Soiled hard plastics
- ▶ Paper-plastic composites

An intelligent control system guarantees an optimal separation of recyclable materials by variable mechanical strain.

Quick amortization by minimizing the quantities to be disposed

- ▶ Saving of disposal costs
- ▶ Revenues from regained recyclable plastics
